

PA 430

Plug-on Display self powered

- ▶ for 4 ... 20 mA / 2-wire or 0 ... 10 V / 3-wire transmitters
- ▶ standard: plug ISO 4400
optionally: M12x1 5-pin or Binder Series 723

Description

The plug-on display PA 430 has been designed to equip 4 ... 20 mA / 2-wire or 0 ... 10 V / 3-wire transmitters with a digital display. Additional up to 2 PNP open collector contacts for a limiting value control can be offered. The plug-on display has to be installed between male and female plug and is ready for work immediately.

Operation

The configuration of the plug-on display PA 430 is menu-driven via two miniature push buttons located in the front. Following parameters could be configured: decimal point, zero point, end point, damping, measuring value update, switch-on and switch-off points, and hysteresis- or compare mode as well as switch-on and switch-off delay of the optional contacts. Those parameters are being stored in an EEPROM and, thus, are being kept also in case of power breakdown. Limit exceeding in both directions can be displayed as a message. Furthermore an access protection is provided.

Application

- ▶ process control in situ

- ▶ rugged, plastic housing
- ▶ quick and easy installation
- ▶ display 330° rotatable
- ▶ plug and thread insertion 300° rotatable
- ▶ 4-digit, red LED display with digit height 7 mm
- ▶ up to two configurable contacts
- ▶ optionally with Ex-protection for 4 ... 20 mA / 2-wire
- ▶ easy configuration via two push buttons
